

9/12/72 Dear Art, Thanks for the CBS wire copy quoting Jack Kirschke on Wolfer. I believe him. I've read too many so-called analyses by too many such "experts" not to know that they are usually police adjuncts. If Kirschke gets Wolfer on the stand and has a good lawyer, it could well end Wolfer's career, get K out and, with a more honest press than I anticipate, do something about the RFK case, where there are a couple of sleepers nobody out there seems to have tumbled to or, if they have, I've not seen it. I'd rather have them sleep for a while...Phoned when you were on vacation about several items, one the recht thing, to let you know that all the quotes about the Kennedy responsibility, aside from being out of context, are also deceptive and incomplete and otherx things wrong with the whole operation. It has led to my separation from a number of those who were both stupid and unethical in related matters. RFK's crime is worse because I was right, forecasting a year in advance with pinpoint accuracy what would happen. Don't know if you have the original Graham piece. I have an extra copy I sent a friend who had one and returned it so I send it herewith. I don't need it back. ...Your new envelope has pleasing color and more, is legible! Now I don't have to wonder if I remember the address correctly...More than impending weather changes makes me want to get out that way but it is impossible (saw first bird migrations yesterday)...If you ever want to chat about the Watergate Caper, hit the horn. I've been following closely. Thanks and best,
